

Slovak Electric
Vehicle Association

Member of

AVERE

The European Association
for Electromobility

Slovak Electric Vehicle Association

The voice of the e-mobility industry since 2012

Jointly for zero-emission e-mobility

What we do

Advocacy and regulations

Regulatory and policy framework in Slovakia and EÚ

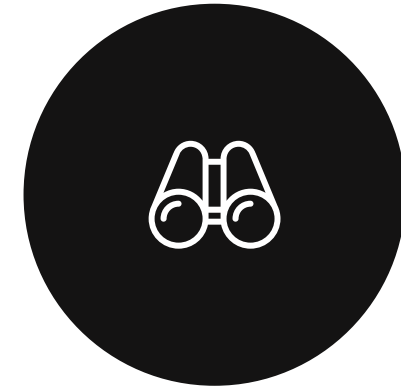

Awareness, visibility and projects

Awareness building, media communication, and international projects

Networking and cooperation

A platform for networking and cooperation in the industry

Market intelligence

Data about the market and monitoring of the regulatory environment

Policy priorities

Our priority is to advocate for a healthy and fair business environment. Through reports and position papers, we work on improving the regulations. We build awareness among the professional and general public.

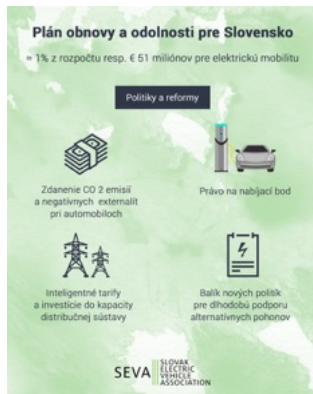

Support for the EV charging infrastructure from Slovakia's Recovery Plan

Implementation of policies from Slovakia's Action Plan for E-mobility

Support for electric fleets

Support for electric heavy-duty vehicles

Other policies (e.g., fire prevention, upgrades of distribution grids)

Awareness

We focus on raising public and media awareness, knowledge transfer to the government, market data collection, joint events and exhibition booths, and projects focused on e-mobility and innovations.

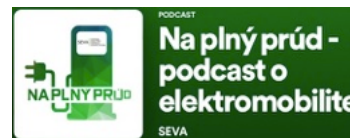

Media communication, press releases, and social networks

SEVA podcast “Na plný prúd”

Events and exhibitions (e.g., Efleet Day 2023, EES/Power2Drive 2023)

Collection and sharing of market data (e.g., EV charging network)

Reports and information materials

Cooperation in the EU

Our priority is international cooperation within the CEE and EU network. The objective is to shape the regulations, get the intelligence for our members and promote networking with our partners abroad.

AVERE

Contribution to the EU effort and intelligence about upcoming policies as a regular member of the European Association for Electromobility

CEE Green Transport Initiative

Networking in the CEE region and advocacy for regional interests towards the EU institutions as a founding member of the CEE GTI platform

International projects

Projects to promote networking

How SEVA operates

Slovak Electric Vehicle Association (SEVA) operates as an association of corporate entities representing the vast majority of private stakeholders in Slovakia's e-mobility industry.

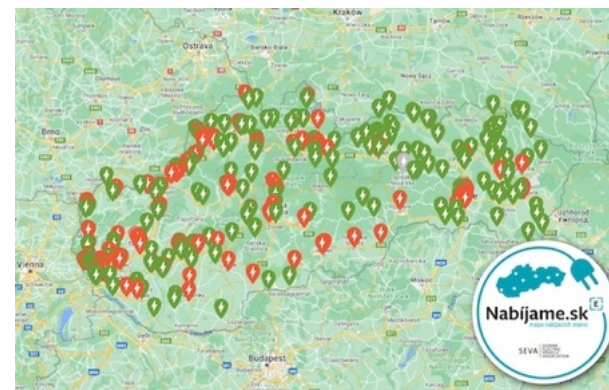

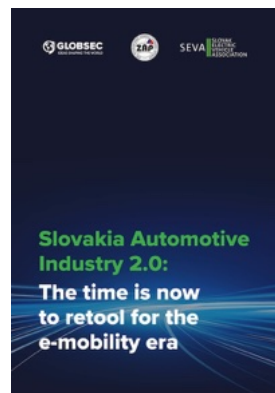

Working groups (WG Infrastructure, WG Vehicles, WG eHDV)

Formal and informal meetings, networking, and sharing ideas

Joint position papers and recommendations

Data collection and presentation for better industry representation

Bronze Cluster Management Excellence badge from ESCA

Join us

and shape the e-mobility ecosystem!
